**Organized, dedicated and ambitious Full Stack Developer, working efficiently in a team which provides support with front-end processes and back-end solutions. Keen to work with new technologies, resourcefulness and innovation. Passionate about writing clean and functional code while following design patterns with strong attention to detail.**

## WORK EXPERIENCE

### *Jul 2023 – Present* **Elegento – Full Stack Developer / Athens, Greece**

*Working on full stack applications applied on ecommerce solutions and developing custom back-office web applications using Next.js, React, TypeScript, Node.js and Laravel.*

- Supporting Headless Magento 2 e-commerce solutions utilizing technologies like React and Redux for Progressive Web App (PWA) support and GraphQL
- Contributing to the development of custom back-office web applications using Next.js, React, TypeScript and Laravel enhancing internal processes for client management.
- Utilizing Next.js to implement Headless WordPress websites with GraphQL, ensuring seamless integration and efficient content management.
- Assisting in the development and bug fixing of a dynamic questionnaire application using TypeScript, React, and Node.js, ensuring smooth functionality and user experience.
- Building search web tool using Alpine.js, Laravel and integrate with OpenSearch
- Providing support on existing Magento 2 e-commerce solutions for both front-end and backend implementations
- Communicating with clients on the progress of current projects and the application of newly developed company solutions

### *May 2021 – Jul 2023* **iTrust Digital – Full Stack Developer / Thessaloniki, Greece**

*Providing web development support to agency clients by creating custom websites and e-commerce platforms*

- Improving UX/UI for clients' websites and e-commerce platforms through front-end solutions
- Developing custom applications on top of WordPress sites using React
- Deploying WordPress Sites with custom themes built from scratch and custom Gutenberg blocks
- Collaborating with SEO and creative teams to optimize user experience for each client's websites
- Incorporating web accessibility best practices in projects to ensure all users can access and use websites
- Designing and developing API endpoints to synchronize and send data between websites ensuring accurate and up-to-date information for clients
- Optimizing mobile applications to improve performance and user experience (React Native)
- Handling the day-to-day client communication and providing feedback about ongoing tasks
- Providing guidance to interns through training session
